

## AD1295 – Mahasi wellfield

Well AD1295 “MAHASI 6 (DEEP)” in the Mahasi wellfield has a fit linear trend of +45  $\mu\text{S}/\text{cm}/\text{yr}$  ( $R^2=0.34$ ). The EC was flat for more than 10 years, but the 4 most recent data are very high. Further EC measurements in the future should clarify the levels in this area.
